

(A) Full information:
linear models with dependent data

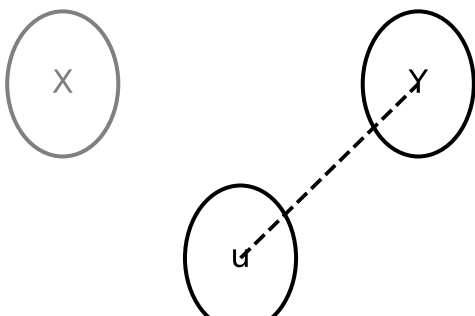

all correspondences observed

(B) Unlinked regression / unlabeled sensing

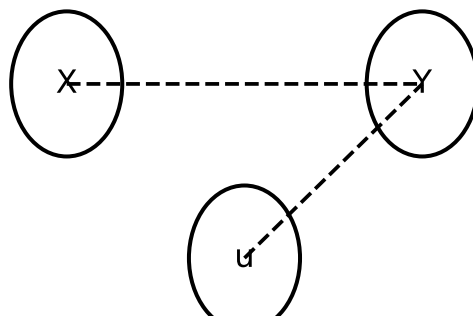

focus on $X-Y$ only, $X \leftrightarrow Y$ broken

(C) Seriation / pseudotime / spike sorting

focus on $u-Y$ only, $u \leftrightarrow Y$ broken

(D) This paper:
unlinked linear models with dependent data

both $X \leftrightarrow Y$ and $u \leftrightarrow Y$ broken
privacy-preserving data fusion, multimodal integration
