

Both keys unknown, $K=20$, $\beta = 4$: the pairing is identified, the placement is not

pairing $Y_i \leftrightarrow X_j$
(truth = diagonal)
mean diagonal = 0.23

location key: Y at location k
(truth = diagonal)
mean diagonal = 0.05

covariate key: X row at location k
(truth = diagonal)
mean diagonal = 0.05
